

Introducing Another Rugged Solution For Pickup Storage...

# TRUCK TRUNK™

Ultra Series

More Than Just A Toolbox!!

Some toolbox manufacturers would like you to believe they make a better product; others claim to build the best. We don't make any outlandish claims... our goal is simple...to deliver to you...a product crafted with painstaking care...a product that delivers exceptional value for your hard-earned dollar...a product proudly backed by factory-direct support!!!

At Creative Industries we produce innovative solutions for your pickup storage needs! Our quality construction and unique patented features are unmatched by ordinary toolbox manufacturers.

## ULTRA SERIES BENEFITS:

- Ultra-Clean Low Profile
- Ultra-Secure Latch & Lock System
- Ultra-Strong Riveted Construction Combined with Rigid Extruded Framework
- Ultra-Convenient No Holes/No Tools Mounting System
- Ultra-Weather Resistant Design
- Ultra-Heavy-Duty Reinforced Lid

Whether you're at work, or at play, our storage compartments will serve you for years to come. Our unique designs offer you

the large capacity of chest style boxes, but still provide maximum use of the length of your pickup bed! The low profile looks great and doesn't hinder your rearward view, while providing convenient access to your valued possessions. This unit is the ideal companion for the RVer, contractor, outdoor enthusiast or anyone in need of weather-resistant and secure storage.

**Most cars have trunks...why not your pickup too?!!!**

If convenience matters...it's hard to ignore our no holes/no tools mounting system. Install or remove this box in minutes with the heavy-duty clamp shown above...no tools required! Like many of our patented features, this system is a complete integrated design...not an afterthought.

Our boxes are built to last...they feature our exclusive extruded perimeter framework, 6000 psi riveted laminate seam construction, and over .125" material thickness at key stress points. The heavy-duty reinforced lid provides wide-open access for your convenience!!

The Ultra Series proudly features our exclusive full-length extruded latch & lock system (Patent Pending). If you question the convenience and security of typical 1 or 2 point toolbox latch & lock systems...check this out...latch access across the entire length of the box and a pry-resistant lock system which engages full-length as well!!
